

MCC NEWSLETTER JUNE 2016

MCC has had unprecedented growth over ten years. Many organizations and individuals have participated in Metric Champion Consortium (MCC) work groups and been instrumental in driving the adoption of MCC metrics by their organizations. While MCC thanks everyone for their support, we would like to ac-

knowledge the important contributions made by a select group of individuals. Please join me in congratulating the inaugural class of **MCC Champion Award** recipients—an honor bestowed upon individuals who have made significant contributions to advancing the MCC mission to improve the efficiency, quality, and effectiveness of clinical trials [[MCC Announces Inaugural Class of MCC Champion Award Recipients](#)].

The MCC team has been on the road speaking at industry meetings, holding one-on-one meetings with members, and hosting a series of MCC meetings in San Francisco, Boston, Princeton, and Raleigh-Durham. We appreciate the opportunity to engage with our members in face-to-face settings; we gain valuable insights that guide us in the development of MCC's programs. The next stop on the "MCC road trip tour" is the *DIA Annual Meeting in Philadelphia (June 26-30 2016)*. Results from the **2015 MCC Risk Management and Risk-based Monitoring Industry Survey** will be discussed in the session, "Risky Business: Latest Trends, Strategies, and Tools for Predicting Success and Monitoring Risk During Clinical Trial Operations" on Wednesday, June 29 at 2pm. The full report analyzing current risk assessment and risk-based monitoring practices as well as a comparison of what has changed from a similar survey conducted in 2013 will be available in July 2016.

Earlier this year, we announced a new program: the **MCC Solution Provider** program. This innovative program opens the door for IT system providers to integrate MCC performance metrics and scoring tools into existing and new IT systems. This exciting development will make it

**Past DIA Events:**

- » MCC Risk Assessment and RBM Survey Session
- » MCC TFM WG Networking Event

## MCC NEWSLETTER JUNE 2016

easier for organizations to adopt and utilize standardized metrics across their programs. Triumph Research Intelligence is the first organization to receive the MCC Solution Provider designation by offering an online version of the MCC Risk Assessment & Mitigation Management Tool that integrates with their OPRA Risk-based Monitoring and Quality Management platform. Keep your eye on the MCC website news area for announcements about additional Solution Provider designations.

Furthermore, MCC is vetting and training industry consultants to participate in the new **MCC Ambassador Network**. This network consists of experienced industry consultants who have completed the MCC Metric Boot Camp Program and are familiar with MCC products and services relevant to their areas of expertise. This summer, you will be able to query the Ambassador Network Database to identify consultants with functional expertise and metric knowledge.

Recently, MCC distributed MCC tabletop signs that MCC Members, Ambassadors, and Solution Providers can display in their exhibit booths at industry conferences. Look for these new **exhibit booth signs** at upcoming industry meetings and learn more about how their services can support your organization's metric program.

In closing, please visit the newly updated [MCC website](#) to find the latest news about MCC metric sets, scoring tools, surveys, and publications. The new website design is easy to navigate and contains up-to-date information, including:

- **Information Videos**
- **Self-help Guides**
- **Links to Open Surveys**
- **Updated Work Group Descriptions and Performance Metric Info Sheets** (see **Metric Sets and Tools** area) including:

## MCC NEWSLETTER JUNE 2016

- **New Metrics and Key Risk Indicators:** MCC Clinical CAPA process metrics version 1.0 and Site Key Risk Indicators v1.0.
- **Metrics Under Review:** Clinical Trial Performance Metrics v 1.2 and 2014 quality metric sets
- **Metrics In- Development:** eClinical Outcome Assessment and Trial Master File metrics

Please visit the MCC website and join our LinkedIn Group to learn more about MCC and stay abreast of new developments.

Sincerely,

Linda B. Sullivan

Co-Founder and President

### About MCC

MCC is a trusted partner in the clinical trials industry to identify what to measure and assess the critical components of what is changing and how the industry is responding to address the changes to make improvements. We continually bring you new insights into the leading trends within the industry. To become a member, visit [metricschampion.org](http://metricschampion.org).
